OKV Nigeria Payroll & HR Management System

Full User Manual — Admin & Staff with Full Module Access

1. Getting Started

OKV Nigeria Payroll & HR Management System is a cloud-connected, offline-capable app for running payroll and HR for Nigerian organizations. This manual covers the online (multi-user, cloud-synced) edition.

Installing the app

- Open the install link your Admin shared with you (or visit the site and click "Start 7-Day Free Trial").
- Follow the on-screen instructions for your device — Android, iPhone/iPad, or desktop.
- Once installed, the app opens straight to the login screen.

Logging in

- Enter the username/email and password your Admin gave you.
- First login requires an internet connection. After that, the app works offline and syncs automatically when you're back online.
- Every screen has a Log Out option in the account menu at the top right.

2. Roles & What You Can See

Your Admin assigns you one or more roles, and each role unlocks a different set of sections. You can hold more than one role at once.

Role	Sections Unlocked
HR/Payroll Super Admin	Everything except Users & Access management
HR Manager	Dashboard, Employees, BioData, Leave Register, Reports
Payroll Officer	Dashboard, Payroll Input/Calculation, Payslips, statutory setup, Reports
HR Officer	Dashboard, Employees, BioData, Leave Register
Finance Manager / Accountant	Dashboard, Payroll Calculation, Payslips, Loan Register, Reports
Compliance Officer	Dashboard, Reports, statutory setup, Settings
Employee / Staff Self-Service	My Portal only — their own payslip, leave, loan

Everyone, regardless of role, can access Messages and this User Manual.

3. Employees & BioData

- Employees: add, edit, or remove staff records — salary components, bank details, department, status.
- Staff BioData: date of birth, gender, marital status, state of origin, next-of-kin details.
- Use Import CSV / Export CSV on either tab to bulk-load or download records — click the (i) icon for the exact column format required.

4. Payroll

Payroll Input
Enter overtime, bonus, and loan deductions per employee for the current period — Payroll Calculation updates live as you type.

Payroll Calculation & Payslips
See the full breakdown per employee (gross, statutory deductions, net pay). Download a single payslip, a department's payslips, everyone's payslips, or a full year for one employee.

Statutory Setup
PAYE Tax Table, Pension, NHF, and Life Assurance rates are pre-loaded with current Nigerian statutory defaults and can be adjusted in Settings if regulations change.

5. Leave & Loan Registers
- Leave Register: log and approve/reject leave requests by type (Annual, Sick, Maternity, Study, etc.).
- Loan Register: track staff loans, monthly deduction amounts, and outstanding balances — deductions flow automatically into Payroll Calculation.

6. Reports
Company-wide dashboards and charts — headcount by department, payroll cost trends, leave and loan summaries — for roles with Reports access.

7. Announcements, Payslip Delivery & Messages
Sending Announcements
Available to Admins and HR Manager / HR Officer / Payroll Officer roles. From Announcements, compose a message and send it to all staff or selected employees, by Email, SMS, or WhatsApp. Choose a type — General Announcement, Birthday, Work Anniversary, or Personalized/Other — and use %NAME% in your message to auto-insert each person's first name.

Note: SMS and WhatsApp require your Admin/developer to connect a provider first (Termii, Twilio, or similar). Email always works out of the box.

Emailing Payslips
From the same Announcements screen, email that period's payslip to all active employees or a selected few, straight to the email address on their Employee record.

Messages
A simple inbox for direct messages between the Admin and any User in your organization — useful for quick questions that don't need a full announcement.

8. Users & Access (Admin only)
- Add new Users, assign one or more of the 7 roles, and edit those roles anytime.
- Activate or Suspend a User — suspended Users are signed out immediately and can't log back in until reactivated.
- Set a User's password directly (no email involved) if they forget it — only the Admin's own password uses the email-based "Forgot password" flow.
- Share Install Link — copy the installation page link to send to new staff.

9. Upgrade & Subscription (Admin only)

Every organization starts with a 7-day free trial. Your dashboard shows the days remaining and a gold Upgrade icon throughout the trial.

To upgrade: open Upgrade & Subscription, pick a plan and billing cycle, make the bank transfer shown, upload your payment screenshot, and submit. You'll get an email on your status within the hour, and confirmed upgrades activate automatically — your dashboard will then show your plan's start date, due date, and time remaining.

10. Offline Use & Sync

- Every change you make saves to your device immediately, online or offline.
- The Sync button in the topbar pushes and pulls the latest data on demand; auto-sync also runs every 60 seconds while online.
- First-ever login on a new device needs internet; after that, the app works fully offline until you reconnect.
