1. About this manual

This is the complete, step-by-step guide to the **OKV Nigeria Payroll & HR Management System** — an offline-first, cloud-synced payroll and HR workspace built for Nigerian businesses, churches, schools, NGOs and other organisations. It is written for three kinds of reader:

- **Organisation Admins** who set the system up, add staff and users, run payroll and manage the subscription.
- **HR, Payroll, Finance and Compliance users** who work in specific parts of the system every month.
- **Employees** who use **My Portal** to see their own payslip, leave and loan balance (they also have their own short Quick Guide).

How the manual is organised

Chapter	What it covers
2 Getting started	Starting the free trial, installing the app on any device, logging in, and the first-time setup checklist.
3 A tour of the workspace	The sidebar, top bar, trial and sync indicators, and how the app behaves on phones.
4 Roles and access	The seven roles and exactly which tabs each one unlocks.
5 Module guides	One guide per tab: Dashboard, My Portal, Employees, BioData, Payroll, Payslips, statutory registers, Leave, Loans, Announcements, Messages, Reports, Settings, Users & Access, Backup, Upgrade & Subscription.
6 Payroll explained	The exact formulas the system uses, with a fully worked example and the monthly pay-run routine.
7 CSV import and export	Column-by-column guide for bulk loading and exporting data.
8–10 Offline, backup, security	How offline mode and sync work, backup discipline, and good security habits.
11–13 Help	Troubleshooting table, FAQ and glossary.
Appendices	Month-end checklist, and the statutory rates notice you should read before running live payroll.

Read Appendix B before you run live payroll

Nigeria's tax law changed on 1 January 2026 (Nigeria Tax Act 2025). The PAYE table and calculation shipped in this version of the system follow the earlier structure (seven-band table with Consolidated Relief Allowance). Appendix B explains the difference and what to do. Always confirm statutory figures with your accountant or the tax authority before paying staff.

Conventions used

- **Bold** words are buttons, tabs or field names exactly as they appear on screen.
- A green **Tip** box is a shortcut or good habit; an amber **Heads up** box warns about something easy to get wrong; a red box is important.
- Amounts are in Nigerian Naira (₦). Dates in import files use the format `YYYY-MM-DD`.

Plans at a glance

	Essential	Enterprise
Best for	Small businesses and startups	Growing companies, NGOs, churches, schools and institutions
Employees	Up to 20	Unlimited
Users	1 Admin + up to 3 staff Users	Unlimited Users with all 7 role types
Reports & analytics dashboard	Core payroll and HR modules	Full Reports & analytics
Backup	Backup & restore	Advanced backup & restore
Support	Email support	Priority support and dedicated onboarding assistance
Monthly / 6-month / yearly	₦15,000 / ₦80,000 / ₦150,000	₦35,000 / ₦190,000 / ₦360,000

Every plan starts with a **7-day free trial, no card required**, and paid plans carry a **30-day money-back guarantee**. Prices and descriptions are set by OKV Technology Consults and may change; the live figures always appear on the Pricing page and on the Upgrade & Subscription tab.

2. Getting started

2.1 Start your free trial

1. Open the OKV Payroll website and choose **Start 7-Day Free Trial** (or try the **Live Demo** first — it is a fully browsable sandbox with sample data where nothing is saved).
2. On the Pricing page pick **Monthly**, **Bi-Annual** or **Yearly**, then click **Start for Free** on Essential or Enterprise. The plan and billing cycle you chose carry through to the sign-up form.
3. Fill in **Organization Name, Full Name, Email, Phone, Username** and a **Password** (at least 8 characters). Tick the box agreeing to the Terms of Service and Privacy Policy, then click **Create Account**.
4. You land on the **install page** (section 2.2). Install the app, or choose to continue in the browser, and then log in.

Creating the account starts your **7-day trial** immediately. The person who signs up becomes the organisation's **Admin** — there is exactly one Admin per organisation, and that account always has full access.

> **Your data is private to your organisation**
> Each organisation is stored separately. People in other organisations can never see your employees, payroll or messages, and you never see theirs.

2.2 Install the app on your device

The system is a Progressive Web App (PWA). Installing it gives you an icon on your device that opens straight to the login screen, and lets you keep working with no internet. No app store is needed. **You need internet to log in the first time on each device**; after that first sync, everything works offline.

Device	How to install
Android (Chrome, Edge, Samsung Internet)	Tap the gold **Install Now** button on the install page and confirm **Install**. If nothing happens, open the browser's ⋮ menu and choose **Install app** or **Add to Home screen**.
iPhone / iPad	Must be done in **Safari** (not Chrome). Tap the **Share** icon → **Add to Home Screen** → **Add**. If you opened the link in another app, copy it into Safari first.
Windows (Chrome or Edge)	Click **Install Now** then **Install** in the popup, or use the install icon at the right edge of the address bar. It opens in its own window with a Start Menu / Desktop shortcut. Firefox on desktop cannot install apps — use Chrome or Edge, or continue in the browser.
Mac (Safari, macOS Sonoma 14 or newer)	In Safari choose **File → Add to Dock…** (or Share → Add to Dock), confirm the name and click **Add**. On older macOS use Chrome or Edge instead.

> **Inviting your staff**
> Admins can copy a ready-made install link from **Users & Access → Share Install Link** and send it to staff. It shows device-specific install steps only; staff then sign in with the username and password you created for them.

2.3 Logging in

1. Open the installed app (or the login page in your browser).
2. Enter your **username** and **password** and press the log-in button. Admins, Users and the platform Super Admin all use the same form; the system routes you to the right dashboard.

3. If your organisation is suspended, your trial has ended or your subscription has expired, login is refused with a clear message. Upgrade or renew from another device or contact support.

Forgotten password

- **Admins**: use **Forgot password?** on the login page. A reset email is sent; its link works **once** and expires after **60 minutes**. Open it and choose a new password (minimum 8 characters).
- **Users** (HR Officer, Payroll Officer, staff, etc.): ask your Admin to set a new password for you from **Users & Access → Set Password**.

Sessions last **30 days** on a device. Use **Log Out** from the account menu (top-right) on any shared or public computer.

2.4 First-time setup checklist

Work through this once, in order. It takes most organisations well under an hour for the first pass.

#	Step	Where	Why it matters
1	Enter company name, address, phone, email, RC number and upload a logo (under 300KB)	Settings → Company Information	Appears on the dashboard, payslips and printed reports.
2	Set the payroll month and year	Settings → Payroll Period	Every calculation, payslip and archive is tied to this period.
3	Review pension, NHF, life-assurance and relief rates	Settings → Statutory Rates & Deductions	These drive every payroll figure — see Appendix B before going live.
4	Add employees (one by one, or import a CSV)	Employees	Basic, housing, transport and other allowances create the gross salary.
5	Add BioData: date of birth, next of kin, etc.	Staff BioData	Keeps one complete record per person.
6	Enter overtime, bonus and loan deductions for the month	Payroll Input	These flow straight into Payroll Calculation.
7	Check the results, then **Confirm & Archive This Period**	Payroll Calculation	Locks the official record for the month.
8	Print, download or email payslips	Payslip / Announcements	Staff receive their own payslips.
9	Create Users, assign roles and link staff to their records	Users & Access	Gives each person the right access — and My Portal for self-service.
10	Download your first full backup	Backup & Export	Your personal safety copy.

3. A tour of the workspace

3.1 The sidebar

The dark sidebar on the left (behind the ☰ menu button on phones) groups every tab. You only ever see the tabs your role allows.

Group	Tabs
Overview	Dashboard, My Portal
Employee Management	Employees, Staff BioData
Payroll	Payroll Input, Payroll Calculation, Payslip
Statutory & Compliance	PAYE Tax Table, Pension Setup, NHF Setup, Life Assurance
HR Management	Leave Register, Loan Register
Communication	Announcements, Messages (with a red unread-count badge)
Analytics	Reports
System	Settings, Users & Access, Backup & Export, Upgrade & Subscription, User Manual

The Admin sees all 21 tabs. Privacy Policy and Terms links sit at the bottom of the sidebar.

3.2 The top bar

Item	What it shows or does
Page title	The name of the tab you are on.
Today's date	Your device's date (refreshed every minute).
Payroll period pill	The month and year set in Settings — the period all payroll screens are working on.
Organisation name	Your organisation, taken from Settings.
Upgrade (gold)	Shown while you are on trial: takes you to the pricing page.
Sync button	Shows *Synced*, *Syncing…*, *Pending sync*, *Offline* or *Sync error*. Click it to push and pull immediately.
Account menu	Your name and role; **Change Password**; **Log Out**.

Banners you may see

- **Trial strip** — "Free trial — N days remaining", turning urgent in the last two days, with an **Upgrade now** link. The Dashboard also shows a matching trial card.
- **Active plan card** — once your upgrade is confirmed, the trial card is replaced by "Essential/Enterprise Plan — Active" with start and due dates and a countdown.
- **Offline strip** — appears when your device has no connection: you can keep working; changes save on the device and sync automatically later.

3.3 Using it on a phone or tablet

- Tap ☰ to open the sidebar; tap outside it or the × to close it.
- Wide tables show a *Swipe to see more columns* hint — slide sideways to see every column.

- Key figures on the Dashboard stack into a two-column grid so numbers never get cut off.
- Printing hides the sidebar, top bar and footer so printed pages contain only the report or payslip.

4. Roles and access

The Admin creates Users in **Users & Access** and gives each one **one or more roles**. A user's tabs are the combination of all their roles. The Admin account itself always has every tab, whatever roles are assigned.

4.1 The seven roles

Role	Designed for	Tabs unlocked
HR/Payroll Super Admin	A trusted HR or payroll lead who runs everything except user management.	Dashboard, Employees, BioData, Payroll Input/Calculation, Payslip, PAYE/Pension/NHF/Life Assurance, Leave, Loan, Reports, Settings, Announcements
HR Manager	Head of HR.	Dashboard, Employees, BioData, Leave, Reports, Announcements
Payroll Officer	Prepares and checks payroll.	Dashboard, Payroll Input/Calculation, Payslip, PAYE/Pension/NHF/Life Assurance, Reports, Announcements
HR Officer	Day-to-day staff records.	Dashboard, Employees, BioData, Leave, Announcements
Finance Manager / Accountant	Reviews cost and pays out.	Dashboard, Payroll Calculation, Payslip, Loan, Reports
Compliance Officer	Checks statutory setup.	Dashboard, Reports, PAYE/Pension/NHF/Life Assurance, Settings
Employee / Staff Self-Service User	Ordinary staff.	**My Portal** only: own payslip, loan balance, leave requests and reports

4.2 Rules that apply to everyone

- **Messages** and **User Manual** are available to every user, whatever their role.
- **Announcements** (sending email/SMS/WhatsApp and emailing payslips) is limited to the Admin, HR/Payroll Super Admin, HR Manager, HR Officer and Payroll Officer.
- **Users & Access, Backup & Export** and **Upgrade & Subscription** are Admin-only.
- A user with **no roles** yet is shown **My Portal** only (the safest default) until the Admin assigns a role.
- A user is scoped to **their own organisation** at all times.

4.3 Tab-by-role matrix

Tab	Admin	HR/Pay SA	HR Mgr	Pay Off	HR Off	Fin Mgr	Compl	Self-Svc
Dashboard	✓	✓	✓	✓	✓	✓	✓	
My Portal	✓							✓
Employees / BioData	✓	✓	✓		✓			
Payroll Input	✓	✓		✓				
Payroll Calc / Payslip	✓	✓		✓		✓		
PAYE / Pension / NHF / Life	✓	✓		✓			✓	
Leave Register	✓	✓	✓		✓			
Loan Register	✓	✓				✓		
Reports	✓	✓	✓	✓		✓	✓	
Settings	✓	✓					✓	
Announcements	✓	✓	✓	✓	✓			
Messages / User Manual	✓	✓	✓	✓	✓	✓	✓	✓
Users / Backup / Upgrade	✓							

Least-privilege in practice

Give people only what they need. A bookkeeper who only needs to see payslips and loans is a **Finance Manager / Accountant**, not a HR/Payroll Super Admin. You can add or remove roles at any time; the change takes effect the next time that person signs in.

5. Module guides

Each guide below follows the same pattern: who can open the tab, what you see, how to do the common tasks, and things worth knowing. Tabs appear in the same order as the sidebar.

5.1 Dashboard

Who can use it	What it is for
Admin and every role except Employee Self-Service	A live summary of the current payroll period and your workforce.

- **Six key figures**: Employees, Gross Payroll, Total PAYE, Total Pension, Total NHF and Net Payroll for the period shown in the top bar.
- **Gross vs Net Pay by Department** (bar chart) and **Payroll Cost Breakdown** (doughnut: Pension, NHF, PAYE).
- **Department Payroll Summary** table — staff count, gross, pension, NHF, PAYE and net for each department.
- **Live Payroll Insights** — totals, average gross salary and average net pay.
- **HR Snapshot** — how many people are on approved leave and how many leave requests are still pending.

Everything recalculates instantly when you change an employee, a payroll input or a setting — there is no “refresh” step.

> **Use it as a pre-flight check**
>
> Before you confirm a pay run, glance at the Dashboard: an unexpected jump in Gross Payroll or a department with the wrong headcount usually points to a typo in an employee’s salary or an overtime entry.

5.2 My Portal (Self-Service)

Who can use it	What it is for
Employee Self-Service users (and the Admin)	Lets each person see only their own pay, loan and leave information.

My Portal works only when the user account is **linked to an employee record** (Admin sets this in Users & Access → *Link to Employee*). If it is not linked, the page says so and asks the person to contact their Admin.

- **My Payslip** for the current period: gross pay, overtime/bonus, pension, NHF, PAYE, loan deduction and net pay.
- **My Loan Balance** — the outstanding balance and monthly deduction of any active loan.
- **My Leave Requests** — click **Request Leave**, choose the type, start and end dates, and submit. The request appears in the HR leave register as *Pending*, and you can follow its status here.
- **My Reports** — choose **Weekly, Monthly, Quarterly or Yearly** and use **Print** or **Download CSV**. *Weekly* shows your leave activity for the week (payroll runs monthly); *Monthly, Quarterly and Yearly* show payroll months that HR has confirmed and archived.

> **Staff also get their own Quick Guide**
>
> Anyone whose only role is Employee Self-Service sees a short **Quick Guide** PDF in the User Manual tab instead of the full manual.

5.3 Employees

Who can use it	What it is for
Admin, HR/Payroll Super Admin, HR Manager, HR Officer	The master employee database. Salary components entered here drive all payroll.

Add an employee

1. Click **Add Employee**.
2. Fill in **Surname, First Name, Department, Designation, Grade Level, Bank Name and Account No.** The department, grade and bank fields let you pick from lists or type your own.
3. Set **Status** (Active, On Leave, Suspended, Terminated or Retired).
4. Enter the pay components: **Basic, Housing, Transport** and **Other Allowance** (monthly, in ₦).
5. Add **Email, Phone**, **Date Employed**, and set **Pension Eligible** to Yes or No.
6. Click **Save Employee**. An Employee ID such as `EMP009` is generated automatically.

Everyday tasks

- **Search** by name, department or ID using the search box above the table.
- **Edit or delete** a row with the icons at the end of the row. Deleting asks for confirmation.
- **Import CSV / Export CSV** for bulk changes (see chapter 7). Importing a row whose ID already exists updates that employee instead of duplicating.

> **Only “Active” staff are paid**
>
> Payroll Calculation, the Dashboard totals, bulk payslips and payslip emailing include **Active** employees only. If someone disappears from a pay run, check their Status first.

> **Gross salary is the sum of four fields**
>
> Gross Salary = Basic + Housing + Transport + Other. Pension and the emolument base use only Basic + Housing + Transport.

5.4 Staff BioData

Who can use it	What it is for
Admin, HR/Payroll Super Admin, HR Manager, HR Officer	Personal and next-of-kin details for each employee — one record per person.

- Click **Add Record**, choose the employee, then enter **Date of Birth, Gender, Marital Status, State of Origin, Qualification, Next of Kin name, relationship and phone**.
- Relationship choices include Spouse, Father, Mother, Brother, Sister, Son, Daughter, Uncle, Aunt, Friend and Other.
- Import/Export CSV is available; importing a row for an employee who already has BioData replaces it.

Keep this data accurate: it supports emergencies, HR files and birthday/anniversary messaging.

5.5 Payroll Input

Who can use it	What it is for
Admin, HR/Payroll Super Admin, Payroll Officer	The monthly variable pay: overtime, bonus and loan deductions.

1. Confirm the payroll period in the page heading (change it in Settings if needed).

2. Find the employee (search box or the **All Departments** filter).
3. Type **Overtime**, **Bonus** and **Loan** amounts for the month and, optionally, a remark. Figures save as you type.
4. Watch the running totals for overtime, bonus and loans at the top.

Payroll Calculation updates live as you enter values. These inputs are not stored separately for each month — they apply to whichever period is current — so review them every month.

> **Reset variable pay each month**
> Overtime, bonus and loan deductions are not cleared automatically when you move to the next month. Update them (or import a fresh CSV) before calculating the new period, or last month's values will carry over.

5.6 Payroll Calculation

Who can use it	What it is for
Admin, HR/Payroll Super Admin, Payroll Officer, Finance Manager / Accountant	The full payroll for every active employee, calculated live from salaries, inputs and Settings.

Each row shows: Emp ID, Name, Department, Gross, Overtime, Bonus, Emolument, Pension, NHF, CRA, Taxable income, PAYE, Loan and **Net Pay**. A totals row summarises the whole company. Chapter 6 explains every formula with a worked example.

Confirm & Archive This Period

At the top of the page a **Period Status** panel tells you whether the current month is archived.

1. Check the figures against your expectations (Dashboard and Reports help).
2. Click **Confirm & Archive This Period** and accept the prompt.
3. The system saves a snapshot of every active employee's figures for that month (a permanent record of gross, deductions, PAYE, loan and net pay).

- Re-running it for the same month **updates** the snapshot — it never duplicates. Use **Re-confirm** if you correct something afterwards.
- The archive feeds individual **Reports** (weekly / monthly / quarterly / yearly) and the **Full-Year payslip pack**.
- Until a month is archived, payslips for it are a live preview that recalculates from current data.

5.7 Payslip

Who can use it	What it is for
Admin, HR/Payroll Super Admin, Payroll Officer, Finance Manager / Accountant	View, print, download and email payslips — for one person, a department or the whole company.

- **Payslip Viewer**: choose an employee to see a formatted payslip with your logo, company details, earnings, deductions and net pay.
- **Print This** prints just the payslip. **Download This Payslip** saves a print-ready document you can open and save as PDF.
- **Email This Payslip** sends it to the email address on the employee's record (visible to roles allowed to send communications).
- **By Department**: pick a department and click **Get** to download every active staff member's payslip for that department.

- **Whole Company**: **Download All Staff Payslips** — one combined document, one page per active employee.
- **Full Year (Selected Employee)**: **Download 12-Month Payslip** — a January–December pack. Archived months show locked figures; other months show a live preview.

> **Archive first, then distribute**
> Confirm and archive the month **before** emailing or handing out payslips, so the payslip matches the permanent record.

5.8 PAYE Tax Table, Pension, NHF and Life Assurance

Who can use it	What it is for
Admin, HR/Payroll Super Admin, Payroll Officer, Compliance Officer	Statutory reference and live registers for each deduction.

Tab	What you see
PAYE Tax Table	The band table (band amount, rate, maximum tax on each band and cumulative tax) plus a **Live PAYE Calculator**: pick an employee to see annual gross, pension, NHF, CRA, taxable income, annual and monthly PAYE and the effective tax rate.
Pension Setup	A live register: each employee's basic, emolument, gross, employee pension and the period; totals for employee and employer pension and the current rate (default 8% employee, 10% employer).
NHF Setup	A live register of NHF contributions at the configured rate (default 2.5% of basic) with a total for the period.
Life Assurance	A live register of the monthly group life premium at the configured rate (default 0.5% of annual gross, divided by 12) with a total.

> **Check the tax table against current law**
> The PAYE table and the relief logic in this version follow the earlier (pre-2026) structure. See **Appendix B** before relying on PAYE figures for a 2026 pay run.

Pension applies only to employees marked **Pension Eligible = Yes**. Life assurance is shown as a register/cost figure and is **not deducted** from the employee's net pay in this version.

5.9 Leave Register

Who can use it	What it is for
Admin, HR/Payroll Super Admin, HR Manager, HR Officer	Record, approve and track leave for every employee.

1. Click **New Leave Request**.
2. Choose the **Employee ID** (department fills in), the **Leave Type** (Annual, Sick, Maternity, Paternity, Study, Compassionate or Unpaid — or type your own), the **Start** and **End** dates and the **Status**.
3. Click **Save Request**. The number of days is calculated from the dates.

- Statuses: **Pending**, **Approved**, **Rejected**. Change the status by editing the row.
- Requests submitted by staff from My Portal arrive here as *Pending* for you to review.
- The Dashboard's HR Snapshot counts approved and pending requests.
- Import CSV / Export CSV are available.

5.10 Loan Register

Who can use it	What it is for
Admin, HR/Payroll Super Admin, Finance Manager / Accountant	Track staff loans, repayments and outstanding balances.

1. Click **New Loan**.
2. Choose the **Employee ID**, enter the **Loan Amount**, the **Monthly Deduction** and the **Outstanding Balance**, and set the **Status** (Active, Completed or Defaulted).
3. Click **Save Loan**.

> **Loan deductions are entered in Payroll Input**
>
> The Loan Register records the loan and its balance. The amount actually deducted in a given month is the **Loan** figure you enter in **Payroll Input**. Update the balance in the register after each deduction so staff see the right figure in My Portal.

5.11 Announcements & payslip delivery

Who can use it	What it is for
Admin, HR/Payroll Super Admin, HR Manager, HR Officer, Payroll Officer	Send messages to all staff or selected employees, and email payslips.

Compose a message

1. Choose who gets it: **All Staff** or **Selected Employees** (tick the names).
2. Choose the **Message Type**: General Announcement, Birthday Message, Work Anniversary or Personalized / Other.
3. Choose the channels: **Email, SMS, WhatsApp** — any combination.
4. Add a **Subject** and type the **Message**. Use %NAME% to insert each person's first name.
5. Click **Send Message**. A **Last Send Result** panel shows how many were sent and lists anyone who failed, with the reason.

Email payslips

In the same tab, choose **All Active Employees** or **Selected Employees** and click **Email Payslips Now**. Each person receives *their own* payslip for the current period at the email address on their employee record. Employees without an email address are reported as failed.

> **Email works out of the box; SMS and WhatsApp need a provider**
>
> Email is sent through the platform immediately. SMS and WhatsApp are delivered only when the platform owner has connected an SMS / WhatsApp provider; until then those recipients are reported as failed with a clear "not configured" reason rather than pretending to send.

5.12 Messages

Who can use it	What it is for
Everyone	A private inbox for messaging within your organisation.

- The left column lists your **conversations** with unread counts; the right shows the selected chat.
- **Admins** start a new conversation with the **+ New message…** drop-down. **Other users** message their Admin — that chat opens automatically.

- Type your message and press **Enter** or the send button. A red badge on the sidebar shows unread messages and refreshes about every 45 seconds.

Messages need an internet connection.

5.13 Reports

Who can use it	What it is for
Admin, HR/Payroll Super Admin, HR Manager, Payroll Officer, Finance Manager / Accountant, Compliance Officer	Analytics and a department report for the current period.

- Summary tiles: departments with payroll, **average gross salary**, **average net pay** and **deductions as a percentage of gross**.
- Charts: **Headcount by Department** and the **Top 5 Gross Earners**.
- **Department Payroll Report**: staff, gross, pension, NHF, PAYE, net and each department's share of total net pay.
- **Workforce & Deductions Summary** for the whole organisation. Use your browser's print function — the layout prints cleanly.

5.14 Settings

Who can use it	What it is for
Admin, HR/Payroll Super Admin, Compliance Officer	Company details, the payroll period and the statutory rates that drive every calculation.

Section	Fields
Company Information	Company Name, Address, Phone, Email, RC Number and Logo (PNG, JPG, SVG or WebP, under 300KB).
Payroll Period	Payroll Month and Payroll Year.
Statutory Rates & Deductions	Pension — Employee Rate (default 8%), Pension — Employer Rate (10%), NHF Rate (2.5%), Life Assurance Rate (0.5%), CRA Flat (₦200,000), CRA % Option 2 (1%), Work Days / Month (22), Minimum Wage (₦70,000).
Organization	Your organisation name and subscription status.
Backup, Export & Printing	Shortcut to Backup & Export and a **Print Current Section** button.

Changes apply **instantly** across every tab and recalculate payroll immediately. Yellow-highlighted fields are the ones that change money — edit them deliberately.

> **Changing a rate changes every payslip that is not archived**
>
> Archived months keep the rates that were in force when they were confirmed; live months recalculate. Confirm and archive a month before changing rates for the next one.

5.15 Users & Access

Who can use it	What it is for
Admin only	Create the people who can sign in, control what they can see, and share the install link.

Add a user

1. Click **Add User**.
2. Enter **Full Name**, **Email** (used to log in) and a **Password** of at least 8 characters.
3. Tick one or more **Roles**.
4. For staff who should use My Portal, choose the matching record under **Link to Employee**.
5. Click **Save User** and give the person their login details and the install link.

Manage users

- **Edit roles** at any time.
- **Set Password** to give a user a new password (this is also how forgotten user passwords are handled).
- **Suspend / Reactivate** a user — a suspended user is signed out and cannot log back in until reactivated.
- **Delete** a user (asks for confirmation).
- **Share Install Link** copies the install-page URL to your clipboard; **Roles Reference** summarises what each role can do.

> **When someone leaves**
> Suspend their user account first (immediate), then remove it later. Also set the employee's status to Terminated or Retired so they drop out of payroll.

5.16 Backup & Export

Who can use it	What it is for
Admin only	Download personal copies of your data and restore them.

- **Download Full Backup (JSON)** — the complete, exact copy of employees, BioData, payroll history, leave, loans and settings. Best for restoring.
- **Download Full Backup (CSV files)** — five spreadsheet-friendly files (Employees, StaffBioData, PayrollInputs, LeaveRegister, LoanRegister). Best for opening in Excel or Google Sheets.
- **Restore From Backup** — choose a `.json` backup and click **Restore This Backup**.

> **Restoring overwrites everything**
> Restoring replaces all current data with the file's contents — there is no undo. Download a fresh backup of your current data first, and only restore files you trust.

Your data is already stored in your organisation's private online account; a backup is an extra personal copy, not the only copy. We recommend a fresh backup **monthly** and always before a large bulk import.

5.17 Upgrade & Subscription

Who can use it	What it is for
Admin only	Move from the free trial to a paid plan and see your request history.

Payment is by **manual bank transfer**, confirmed by the OKV team — no card details are ever entered in the app.

1. Open **Upgrade & Subscription**. The top card shows your trial countdown or active plan.
2. Make a bank transfer for your chosen plan and cycle to the account shown under **Payment Options** (use **Copy Account Number**).
3. In **Submit Payment for Confirmation** check your organisation, name, email and phone (pre-filled), choose the **Plan** and **Billing Cycle** (the amount is shown), and **upload a screenshot** of the payment.

4. Click **Submit for Confirmation**. You are told to expect a reply within the hour.
5. When OKV marks the request **Confirmed**, you receive an email and your dashboard switches to the **Active Plan** card with start and due dates. If a request is **Rejected**, you get an email and your plan does not change.

Recent Requests lists each request with plan, amount, status and date. The system also sends reminder emails: one two days before your trial ends and one on the day it ends, then roughly every two weeks for paid plans, becoming a “renewal due soon” notice in the last week.

> **Money-back guarantee**
>
> Paid plans include a 30-day money-back guarantee. See the Refund Policy on the website for the exact terms.

5.18 User Manual

Every user has a **User Manual** tab. Staff whose only role is Employee Self-Service get the short **Quick Guide** PDF; everyone else gets the **Full Manual**. Click **Download PDF**.

6. Payroll explained

This chapter shows exactly how the system turns a salary into a net-pay figure, so you can explain any payslip to an employee or an auditor. Every figure is calculated monthly from the employee record, the Payroll Input entries and the rates in Settings.

6.1 The building blocks

Term	Formula in the system	Default rate
Gross (monthly)	Basic + Housing + Transport + Other	—
Emolument	Basic + Housing + Transport	—
Employee pension	Emolument × employee rate (only if Pension Eligible = Yes)	8%
Employer pension	Emolument × employer rate (only if Pension Eligible = Yes) — an employer cost, not deducted from pay	10%
NHF	Basic × NHF rate	2.5%
Life assurance	Annual gross × life rate ÷ 12 (shown as a register/cost figure; not deducted from net pay)	0.5%
CRA (annual)	Higher of (CRA Flat, Annual gross × CRA % Option 2) + Annual gross × CRA % Option 1	₦200,000 / 1% / 20%
Taxable income (annual)	Annual gross − annual pension − annual NHF − CRA (never below zero)	—
PAYE (annual)	Taxable income taxed through the band table (section 6.2)	—
PAYE (monthly)	Annual PAYE ÷ 12	—
Total earnings	Gross + Overtime + Bonus	—
Net pay	**Total earnings − Pension − NHF − PAYE (monthly) − Loan**	—

> **Overtime and bonus and tax**
>
> In this version PAYE is calculated from the employee's **annual gross salary components**; overtime and bonus are added to earnings and net pay but are not added into the taxable-income figure. Confirm with your accountant how you wish to treat variable pay for tax.

6.2 The band table used by this version

Annual taxable income band	Rate	Maximum tax on the band	Cumulative tax
First ₦300,000	7%	₦21,000	₦21,000
Next ₦300,000	11%	₦33,000	₦54,000
Next ₦500,000	15%	₦75,000	₦129,000
Next ₦500,000	19%	₦95,000	₦224,000
Next ₦1,600,000	21%	₦336,000	₦560,000
Above ₦3,200,000	24%	No limit	—

Important

This is the seven-band table with CRA that applied before 1 January 2026. See **Appendix B** for what changed and how to proceed.

6.3 Worked example

Ngozi is paid Basic ₦250,000, Housing ₦100,000, Transport ₦50,000 and Other ₦50,000. She is pension-eligible. This month HR enters Overtime ₦20,000 and a Loan deduction of ₦25,000. Default Settings apply.

Step	Working	Result
Gross (monthly)	250,000 + 100,000 + 50,000 + 50,000	₦450,000
Emolument	250,000 + 100,000 + 50,000	₦400,000
Employee pension	400,000 × 8%	₦32,000
NHF	250,000 × 2.5%	₦6,250
Annual gross	450,000 × 12	₦5,400,000
CRA (annual)	max(200,000, 1% × 5,400,000) + 20% × 5,400,000 = 200,000 + 1,080,000	₦1,280,000
Taxable income (annual)	5,400,000 − 384,000 (pension × 12) − 75,000 (NHF × 12) − 1,280,000	₦3,661,000
Annual PAYE	21,000 + 33,000 + 75,000 + 95,000 + 336,000 + (461,000 × 24% = 110,640)	₦670,640
Monthly PAYE	670,640 ÷ 12	₦55,886.67
Total earnings	450,000 + 20,000 overtime + 0 bonus	₦470,000
Net pay	470,000 − 32,000 − 6,250 − 55,886.67 − 25,000	**₦350,863.33**
Employer pension (cost)	400,000 × 10%	₦40,000
Life assurance (cost)	5,400,000 × 0.5% ÷ 12	₦2,250

These are the exact figures produced by the system for these inputs. Displayed amounts are rounded to the nearest naira; the calculation itself keeps the kobo.

6.4 The monthly pay-run routine

1. **Update people**: new joiners, leavers (set Status), salary changes — in Employees.
2. **Approve leave and loans** in the Leave and Loan registers.
3. **Set the period** in Settings (month and year).
4. **Enter variable pay** in Payroll Input (overtime, bonus, loan deduction) — clear last month's values first.
5. **Review** Payroll Calculation, the Dashboard and Reports. Investigate anything unusual.
6. **Confirm & Archive This Period**.
7. **Distribute payslips** (print, download or email) and produce your bank payment list from the payroll table.
8. **Back up**: download a JSON backup and store it safely.
9. **Remit** PAYE, pension and NHF using the Pension, NHF and PAYE tabs as your working papers, after confirming the figures with your accountant.

7. CSV import and export

The Employees, BioData, Payroll Input, Leave and Loan pages each have **Import CSV** and **Export CSV** buttons, plus a built-in format guide. The safest workflow is: **Export first** to get a correctly shaped file, edit it in Excel or Google Sheets, save as **CSV**, then import.

Tab	Columns (in this order)
Employees	`id, surname, first, dept, desig, grade, bank, acct, basic, housing, transport, other, pension, status, dateEmployed, email, phone`
Staff BioData	`empId, dob, gender, marital, state, qualification, nokName, nokRelation, nokPhone`
Payroll Input	`empId, overtime, bonus, loan, remarks`
Leave Register	`id, empId, name, dept, type, start, end, status`
Loan Register	`id, empId, name, dept, amount, monthly, balance, status` (status: Active or Completed)

Rules that prevent errors

- **Numbers only** in money columns — no ₦ symbol and no commas (`250000`, not `₦250,000`).
- **Dates** as `YYYY-MM-DD` (for example `2026-08-11`).
- **pension** is `Yes` or `No`. **status** in an import file should be `Active` or `Inactive` (the on-screen form also offers On Leave, Suspended, Terminated and Retired).
- **id** on the Employees sheet: leave blank to create a new employee with an automatic ID; use an existing ID to *update* that employee.
- Any row whose **empId** does not match an existing employee is **skipped**; the result message reports added, updated and skipped counts.
- Payroll Input rows overwrite existing input for that employee.

> **Always back up before a big import**
> Download a JSON backup first. If an import goes wrong you can restore it.

8. Working offline and syncing

- **Every change is saved to your device immediately** (in the browser's local database), so nothing is lost if the connection drops or the power fails.
- Changes are also queued and **pushed to your organisation's online account automatically** a moment after you stop typing, and again as soon as the connection returns.
- The app also syncs about **every 30 seconds** while you are online. The **Sync** button in the top bar lets you push and pull on demand and shows the current state.
- Each organisation has its own local database on each device, so switching organisations on a shared computer never mixes data.
- **First login on any device needs internet.** After that first sync the whole system works offline.

Two people editing the same list offline

Sync replaces a whole list (for example all Employees) at a time. If two people edit the *same* list on different devices while offline, the person who syncs last wins for that list. For busy teams: agree who edits what, and sync (top-bar button) before and after larger edits.

What needs internet

Login, Messages, sending announcements and payslip emails, Upgrade & Subscription, and the Sync itself. Everything else works offline.

9. Backup discipline

When	What to do
Every month, after archiving payroll	Download the **JSON** backup and save it in two places (for example, your email and Google Drive).
Before any bulk import or restore	Download a fresh JSON backup.
Quarterly	Download the **CSV** set and keep it with your accounting records.
When a staff member leaves	Archive the last payroll first, then set their status; the backup keeps the full history.

10. Security good practice

- Use a **strong, unique password** (at least 8 characters; longer is better) and never share it. The Admin password protects everyone's payroll data.
- Create user accounts **only for people you trust** with your organisation's data, and give each the **narrowest role** they need. Role settings control what each person sees in the app; payroll data is sensitive, so treat every account as trusted access.
- **Suspend leavers immediately** from Users & Access, then remove them later.
- Log out on shared computers, and lock your phone and laptop.
- Keep backup files somewhere private — they contain salaries and bank details.
- Install the app only from the link your Admin shares or the official website, and check the address before typing your password.
- Payslip and announcement emails go to the addresses on employee records — keep those accurate.

11. Troubleshooting

Problem	Likely cause	What to do
“Invalid username or password”	Typing error, or the password was changed.	Re-type carefully. Admin: use **Forgot password?**. User: ask your Admin to **Set Password**.
Login says trial ended / subscription inactive or expired	The 7-day trial or the paid period has run out.	Ask your Admin to upgrade or renew (Upgrade & Subscription), or contact support.
Login says organisation or account suspended	The Admin suspended the user, or the platform owner suspended the organisation.	Contact your Admin, or OKV support for an organisation-wide suspension.
A tab is missing from my sidebar	Your role does not include it.	Ask your Admin to add the right role, then sign in again.
My Portal says “not linked to an Employee record”	The Admin has not linked your user to your employee record.	Ask your Admin: Users & Access → edit user → **Link to Employee**.
An employee is missing from Payroll Calculation or payslips	Status is not **Active**.	Open Employees and set Status to Active.
Payroll figures look wrong	Wrong salary components, stale Payroll Input, or a changed rate in Settings.	Check the employee, clear last month’s overtime/bonus/loan and review Settings. Then read Appendix B on PAYE rules.
Numbers on a payslip changed after I printed it	That month was never archived, so the payslip recalculates live.	Use **Confirm & Archive This Period** before printing or sending payslips.
Payslip email shows as failed	The employee has no email, or the address is wrong.	Add or correct the email on the employee record and resend.
SMS / WhatsApp show as failed “not configured”	No SMS/WhatsApp provider has been connected by the platform owner.	Use Email, or ask OKV about enabling SMS/WhatsApp.
Sync shows “Sync error” or “Pending sync”	Weak or no internet, or a temporary server problem.	Keep working; press **Sync** when the connection improves. Data is safe on the device.
CSV import skipped rows	Employee ID does not exist, wrong headers or bad date/number format.	Export first to get the correct template, fix the rows named in the message, re-import.
Logo does not appear	Image is over 300KB or an unsupported type.	Use PNG, JPG, SVG or WebP under 300KB.
Cannot install on iPhone	Not using Safari.	Copy the link into Safari and use Share → Add to Home Screen.
A restored backup did not change anything	Wrong file type or a corrupted file.	Use a `.json` Full Backup created by this system.
Reset-password link does not work	The link was already used or is older than 60 minutes.	Request a new one from **Forgot password?**.

12. Frequently asked questions

Does it really work with no internet?

Yes. After you have logged in on a device once, employees, payroll, leave, loans and reports all work offline and sync automatically when you reconnect.

Is my data visible to other organisations?

No. Each organisation's data is stored separately and is only available to users of that organisation.

How many people can use it?

Essential: one Admin plus up to three staff Users and up to 20 employees. Enterprise: unlimited employees and Users.

What happens when the trial ends?

A countdown shows throughout the trial. If it ends before you upgrade, access is suspended until you choose a plan. Your data is preserved, not deleted — the Privacy Policy states it is retained for up to 90 days after a lapse in case you wish to resume.

How do I pay?

By bank transfer to the account shown in Upgrade & Subscription, then submit the screenshot. Your plan activates once the payment is confirmed.

Can I get my money back?

Yes, within 30 days of your first payment: contact us and the payment is refunded in full by bank transfer (typically 5–10 business days). See the Refund Policy on the website for the details.

Can staff see each other's pay?

Staff with only the Employee Self-Service role are shown My Portal, which displays only their own payslip, loan and leave. Access levels are applied in the app's screens, so create accounts only for people you trust with company data and keep the Admin password private.

Can I change the pension, NHF or life-assurance rates?

Yes, in Settings → Statutory Rates & Deductions. The PAYE band table itself is fixed in the software and is updated by OKV — see Appendix B.

Can I run payroll for past months?

Change the payroll month and year in Settings, enter that month's inputs, and archive it. Archived months keep the figures that applied when they were confirmed.

How do I move data in from Excel?

Export the page you want, paste your data into the exported file's columns, save as CSV and use Import CSV. See chapter 7.

Where can I get more help?

Email technologyokv@gmail.com, call +234 810 414 1138 or visit www.okvtechnology.com.

13. Glossary

Term	Meaning
Admin	The single owner account of an organisation; always has every tab.
Archive (Confirm & Archive)	Saving a permanent snapshot of a month’s payroll for every active employee.
Basic / Housing / Transport / Other	The four salary components that make up gross pay.
CRA	Consolidated Relief Allowance — a tax relief used in the earlier PAYE regime; abolished from 1 January 2026 (see Appendix B).
Emolument	Basic + Housing + Transport — the base for pension.
Gross pay	Total monthly salary before deductions (Basic + Housing + Transport + Other).
Net pay	Take-home pay after pension, NHF, PAYE and loan deductions.
NHF	National Housing Fund contribution.
Organisation	Your company, church, school or NGO as a separate workspace.
PAYE	Pay-As-You-Earn income tax deducted from salary.
PWA	Progressive Web App — a website that installs like an app and works offline.
Sync	Sending your changes to the online account and receiving others’ changes.
Taxable income	The amount of income on which PAYE is charged after allowable deductions.

Appendix A — Month-end checklist

Print this page and tick as you go.

☐	Task	Where
☐	New joiners added; leavers' status changed	Employees
☐	Salary changes entered and double-checked	Employees
☐	Leave approved / rejected; new requests reviewed	Leave Register
☐	Loans and balances updated	Loan Register
☐	Payroll month and year correct	Settings
☐	Statutory rates reviewed (see Appendix B)	Settings / PAYE Tax Table
☐	Last month's overtime, bonus and loan cleared; this month's entered	Payroll Input
☐	Payroll totals reasonable against last month	Dashboard / Payroll Calculation
☐	Confirm & Archive This Period	Payroll Calculation
☐	Payslips distributed (print / download / email)	Payslip / Announcements
☐	Bank payment list prepared and approved	Payroll Calculation
☐	PAYE, pension and NHF remittance figures confirmed with accountant	PAYE / Pension / NHF
☐	JSON backup downloaded and stored in two places	Backup & Export
☐	Leavers' user accounts suspended	Users & Access

Appendix B — Statutory rates notice (read before live payroll)

Summary

The Nigeria Tax Act 2025 took effect on **1 January 2026** and replaced the earlier personal income tax rules. Published guidance describes these changes for PAYE:

• The **Consolidated Relief Allowance (CRA) was abolished**. • A **₦800,000 zero-rate band** applies. • Six new bands run from **0% to 25%**. • A **Rent Relief** (20% of annual rent, capped at ₦500,000) replaces the CRA for employees who pay and can prove rent. • The 1% minimum tax was abolished.

The PAYE table and calculation in this version of OKV Payroll still use the earlier seven-band table with CRA (chapter 6). **PAYE figures for pay periods from January 2026 should therefore be verified before you pay staff or remit tax.**

B.1 The new bands, as published in guidance

Annual chargeable income	Rate
First ₦800,000	0%
₦800,001 – ₦3,000,000 (next ₦2.2m)	15%
₦3,000,001 – ₦12,000,000 (next ₦9m)	18%
₦12,000,001 – ₦25,000,000 (next ₦13m)	21%
₦25,000,001 – ₦50,000,000 (next ₦25m)	23%
Above ₦50,000,000	25%

Chargeable income is described as gross pay less allowable deductions — pension contributions, NHF, and life assurance premiums, among others — and less Rent Relief where it applies. Guidance on the exact reliefs, on whether NHF contributions are mandatory or opt-in, and on the treatment of bonuses and overtime has continued to develop. **Confirm every rule with a qualified tax adviser or the Nigeria Revenue Service / Joint Revenue Board guidance** for your organisation and state.

Sources consulted when preparing this notice include the Nigeria Tax Act 2025 (Fourth Schedule), PwC Nigeria individual tax summaries, KPMG's September 2025 flash alert on the reforms, and the 2026 personal income tax guidelines of the Joint Revenue Board. This is information, not tax advice.

B.2 What this means for you today

- **Do not treat the PAYE Tax Table tab as the 2026 statutory table.** Its bands are those of the earlier regime even though the page title shows the current year.
- There is **no settings-only workaround**: the band table is part of the software, and Rent Relief and the new deduction rules have no input fields yet.
- Pension, NHF and life-assurance rates *can* be edited in Settings if guidance changes them.
- Until the calculation is updated, **have your accountant verify PAYE for each 2026 pay run** and correct remittance figures as needed.
- Archived months keep the figures produced when they were archived; they do not change if the software is later updated.

Our commitment

OKV Technology Consults maintains the statutory logic in this product. Contact support on +234 810 414 1138 or technologyokv@gmail.com to confirm the status of the 2026 PAYE update for your organisation.

Appendix C — Getting help

Channel	Details
Email	technologyokv@gmail.com
Phone / WhatsApp	+234 810 414 1138
Website	www.okvtechnology.com
Support level	Essential: email support. Enterprise: priority support and dedicated onboarding assistance.

When you contact support, please include: your organisation name, the tab you were on, what you clicked, the exact message you saw, and your device and browser. A screenshot helps.
