#73 • Discovery call (20 minutes) 25

#74 • 10-minute demo flow 25

#75 • Closing script 26

#76 • Handling "I'll get back to you" 26

8. Execution: cadence, 30-day plan and KPIs 27

8.1 Trial-conversion cadence 27

8.2 30-day launch plan 27

8.3 Weekly routine (about 5 hours) 27
8.4 KPIs to track 28

How to use this pack

This pack gives you **76 ready-to-use sales and marketing pieces** for the OKV Nigeria Payroll & HR Management System: WhatsApp messages, SMS, emails, social posts, short-video scripts, campaign strategies, and call/demo scripts. Everything is written in plain, friendly Nigerian business English and can be copied, pasted and personalised in minutes.

Part	What is inside	Items
1 Foundation	Who to sell to, the core message, pricing talk-track, objection answers, and a “say / don’t say” guide.	—
2 WhatsApp & SMS	Cold, warm, follow-up, referral and broadcast messages.	#1–#16
3 Email	Cold outreach, three-step follow-up, trial onboarding, win-back and newsletter.	#17–#26
4 Social posts	Twenty posts for Facebook, Instagram, LinkedIn and X.	#27–#46
5 Short-video scripts	Six reel / TikTok / Status scripts.	#47–#52
6 Sales strategies	Twenty campaigns and channel plays, each with steps and a first action.	#53–#72
7 Call & demo scripts	Discovery, 10-minute demo, closing and objection scripts.	#73–#76
8 Execution	Trial-conversion cadence, 30-day launch plan, weekly routine and KPIs.	—

Placeholders and rules for every message

- **[Name]** = the person; **[Company]** = their organisation; **[Your Name]** = you; **[Link]** = your demo, pricing or sign-up link; **[Phone]** = your WhatsApp number.
- Replace at least **one detail** in every message (their industry, a recent event, a mutual contact). Personalised messages convert far better than copy-paste blasts.
- Never invent customer names, testimonials or statistics. Where a message says **[real customer result]**, use it only once you have one, with permission.
- Respect people’s time and consent: send WhatsApp and SMS to people who know you or have shown interest, offer an easy opt-out, and avoid sending large unsolicited blasts.

Read the “Say / Don’t say” page before you sell

Nigeria’s PAYE rules changed on 1 January 2026. The PAYE table in this version of the product still follows the earlier structure. Do not promise “automatic 2026 tax compliance” until the update is live. The safe, honest claims are listed on page 6.

1. Foundation

1.1 What you are selling (in one breath)

One-line pitch

Payroll and HR software built for Nigerian businesses that keeps working even when the internet or power goes down — run payroll, print payslips, track leave and loans, and keep staff records in one place, from any laptop or phone.

Pillar	Proof you can point to
1. Works offline	Every change saves to the device instantly; it syncs automatically when the connection returns. Install it like an app on Android, iPhone, Windows or Mac.
2. Built for Nigerian payroll	PAYE, pension, NHF and life assurance calculations with editable rates; payslips in ₦; Nigerian banks, states and grade levels built in.
3. Simple and safe to try	7-day free trial, no card; 30-day money-back guarantee on paid plans; every organisation's data kept separate.
4. Everyone gets the right access	Seven roles — from HR Manager to Self-Service — so staff see their own payslip, leave and loan in My Portal.
5. Priced in Naira, sized for SMEs	From ₦15,000 a month. Up to 20 employees on Essential works out to ₦750 per person per month or less.

1.2 Who buys — ten target segments

Segment	Main pain	Hook	Who decides	Best channel
Small businesses (10–50 staff)	Payroll done in Excel; month-end stress; PAYE errors.	"Payroll in an afternoon, not a weekend."	Owner / accountant	WhatsApp, LinkedIn, referrals
Churches and ministries	Paying pastors, workers and staff correctly; records scattered.	"Proper payslips and staff records for your church."	Pastor / church administrator / treasurer	Pastor networks, WhatsApp groups, church admin forums
Private schools	Teachers' salaries, allowances, loans and leave by term.	"One system for staff records and payslips."	Proprietor / bursar / admin officer	School-owner associations, visits, WhatsApp
NGOs and foundations	Donor reporting and audit trails for staff costs.	"Clean, archived payroll for every month."	Finance/operations lead	LinkedIn, email, NGO networks
Clinics and pharmacies	Shift workers, overtime, loans.	"Overtime and loans handled in payroll."	Owner / admin manager	WhatsApp, in-person visits
Hotels, restaurants and retail	Many staff, variable pay, high turnover.	"Add staff fast; pay correctly."	Owner / operations manager	Visits, Instagram, Facebook
Logistics and construction firms	Mixed pay, site workers, cash handling.	"Clear records and payslips for every worker."	Owner / accountant	Referrals, trade associations

Segment	Main pain	Hook	Who decides	Best channel
Accounting and HR consultancies	Running payroll for many clients.	“One dashboard to run client payrolls.” (Enterprise)	Partner / principal	LinkedIn, professional bodies
Schools of skills, training centres, cooperatives	Part-time staff, irregular pay.	“Simple, affordable payroll.”	Director / coordinator	WhatsApp, community events
Existing customers of your Excel management templates	Outgrowing spreadsheets; want sync and multi-user.	“Your templates, upgraded to the cloud.”	Existing buyer	Email and WhatsApp to your buyer list

1.3 Pricing talk-track

	Essential	Enterprise
Monthly	₦15,000	₦35,000
Every 6 months	₦80,000 (save ₦10,000 ≈ 11%)	₦190,000 (save ₦20,000 ≈ 10%)
Yearly	₦150,000 (save ₦30,000 ≈ 17%)	₦360,000 (save ₦60,000 ≈ 14%)
Employees	Up to 20	Unlimited
Users	1 Admin + up to 3 staff	Unlimited, all 7 roles
Best for	Small teams and startups	Growing companies, NGOs, churches, schools, consultancies

- **Lead with the trial:** “Try everything free for 7 days — no card.” Price comes second.
- **Per-person framing:** “On Essential with 20 staff, it is ₦750 per person per month or less.” Do the maths with their headcount.
- **Compare with the real alternative,** not with a competitor: the hours spent each month on spreadsheets, corrections and printing payslips, and the cost of one PAYE or pension mistake.
- **Encourage longer billing:** yearly Essential pays for itself in ₦30,000 saved — two months free.
- **Reduce risk:** 7-day trial, then a 30-day money-back guarantee from first payment.

Simple ROI worksheet (do this live with the prospect)

Question	Their answer	Why it matters
How many employees do you pay?	_____	Sets the plan and the per-person price.
How many hours does your team spend on payroll each month?	_____ hrs	Time saved is the biggest benefit.
What is an hour of that person’s time worth?	₦_____	Multiply hours × value.
How often do you correct payslips or recalculate PAYE?	_____ / month	Errors cost time and trust.
Monthly cost of doing it the old way	₦_____	Compare with ₦15,000 or ₦35,000.

Use the prospect’s own numbers. Do not quote time-saving percentages unless you have measured them with a real customer.

1.4 Objection handling

They say…	You answer…
“We already use Excel and it works.”	“It works until month-end, a formula breaks, or the one person who understands the sheet is away. This gives you the same familiar records, with payslips, leave, loans and backups built in — and CSV import, so nothing is retyped.”
“It’s too expensive.”	“Essential is ₦15,000 a month — ₦750 per person for 20 staff. What does one payroll mistake or one lost weekend cost you? And you can try it free for 7 days first.”
“My internet is bad / we have no light.”	“That is exactly why it was built offline-first. Once you have logged in on a device, you can keep working with no internet; it syncs when the network returns.”
“Is my staff data safe?”	“Each organisation’s data is stored separately — nobody outside your organisation can see it. You also control who can log in and what each person can see, and you can download a backup any time.”
“My staff won’t use it.”	“Only you and your HR team need to. Staff can simply get their payslips by email, or use My Portal on their phone if you choose.”
“Will it calculate our PAYE correctly?”	“It calculates PAYE, pension and NHF with editable rates, and archives every month. Tax rules changed in 2026, so we recommend your accountant confirms PAYE for each pay run while we complete the update — I can tell you the status.” *(Be honest — see the claims guide.)*
“We need to think about it.”	“Of course. The trial costs nothing and takes 10 minutes to set up — can I help you add your first employees so you can judge it with your own data?”
“What if I want my money back?”	“If you pay and it isn’t right, tell us within 30 days of your first payment and we refund it in full by bank transfer.”
“We have more than 20 staff.”	“Then Enterprise is the fit — unlimited employees and users, full reports and priority support, from ₦35,000 a month.”
“Can you import our staff list?”	“Yes — export the template, paste your data, and import. I can help you do the first import on a call.”
“We use another software.”	“What do you like and not like about it? Many teams keep their current tool for a month and run the free trial in parallel, then decide.”
“Can’t you just do it for us?”	“We will help you set it up and onboard your team (Enterprise includes dedicated onboarding assistance).”

1.5 Say / don’t say — keeping every claim honest

You can say	Avoid or qualify
Works offline once installed and logged in on a device; syncs automatically.	“Works without internet for everything.” Login, messages, emailing payslips and upgrades need internet.
Calculates PAYE, pension, NHF and life assurance with editable rates for pension, NHF and life assurance.	“Always up to date with the latest tax law” or “fully 2026-compliant.” The PAYE table needs the 2026 update; your accountant should verify 2026 PAYE. Say it plainly if asked.
7-day free trial, no card required.	“Free forever” or “free plan.” There is no free plan.
30-day money-back guarantee on paid plans (refund to your bank account, typically 5–10 business days).	Instant refunds, or refunds after 30 days.
Essential is designed for up to 20 employees and 1 Admin + 3 users; Enterprise is unlimited.	Promising exact limits as technical hard stops. (Limits are a plan guideline; say “designed for”.)
Your organisation’s data is kept separate from other organisations’ data.	“Bank-grade”, “unhackable”, or certifications you do not hold.
Role-based access so each person uses the tabs you choose.	Claiming staff can never access others’ data by any means. Say staff see only their own payslip in My Portal.
Backup and restore you control.	Guarantees of zero data loss.
Used by [real customer] — only with permission and a real result.	Invented testimonials, logos, customer counts or percentage savings.
Email payslips to staff; SMS/WhatsApp when a provider is connected.	Saying SMS/WhatsApp work out of the box.

Turn honesty into a selling point

Buyers of payroll software are nervous about mistakes. Saying “we help you verify PAYE each month and we archive every pay run so you always have a record” builds more trust than an over-promise that falls apart at first payroll.

2. WhatsApp & SMS messages

Keep WhatsApp messages short, human and about **them**. Send one question at a time, and always make it easy to say “not now”. Use voice notes for warm contacts — a 30-second voice note beats a long paragraph.

WhatsApp — first contact

#1 • Small-business owner — cold intro [WhatsApp]

Good morning [Name], this is [Your Name] from OKV Technology Consults.

Quick question: how do you currently prepare payroll and payslips at [Company] — Excel, or something else?

I ask because we built a payroll and HR app for Nigerian businesses that works even when the internet or light is off, and I thought it could save you time at month-end. If it’s useful, I can send a 2-minute demo link. If not, no wahala.

#2 • Church or ministry administrator [WhatsApp]

Good day [Name], [Your Name] here from OKV Technology Consults.

We help churches and ministries keep staff records, payslips, leave and loans in one place, so the administrator is not stuck with spreadsheets at month-end.

Would it be okay if I sent you a short demo link? You can look at it at your convenience and tell me what you think.

#3 • School proprietor or bursar [WhatsApp]

Good morning [Name]. I’m [Your Name] from OKV Technology Consults.

Many schools tell us teachers’ salaries, allowances, loans and leave are hard to keep track of each term. We built a simple payroll and HR system that prints payslips, tracks leave and loans and keeps records for every staff member.

Can I send you a 2-minute demo so you can see if it would help [School name]?

#4 • Accountant or HR consultancy — partner pitch [WhatsApp]

Hello [Name], [Your Name] from OKV Technology Consults.

Do you prepare payroll for clients? We’ve built a Nigerian payroll and HR system with role-based access and an Enterprise plan for unlimited employees. I’d love to show you how it could make your month-end faster and explore a referral arrangement.

Are you open to a 10-minute call this week?

#5 • Warm lead after a referral [WhatsApp]

Hello [Name], [Referrer] suggested I reach out. He/she mentioned that [Company] handles payroll for around [number] staff.

We help businesses like yours run payroll, payslips, leave and loans in one app — and it keeps working offline. May I show you a 2-minute demo?

WhatsApp — follow-ups and conversion

#6 • Follow-up after 3 days of silence [WhatsApp]

Hi [Name], just checking in in case my last message got buried. Would a quick look at the demo be useful for [Company], or should I check back after month-end? Either is fine.

#7 • Follow-up with value (month-end tip) [WhatsApp]

Hi [Name], a month-end tip we share with clients: before you finalise payroll, check that every leaver is marked inactive, variable pay (overtime/bonus/loans) has been updated, and the payroll month is correct. It prevents most corrections.

If you'd like a free checklist or a quick demo of how we do this in the app, just say "checklist" or "demo".

#8 • Demo invitation [WhatsApp]

Hi [Name], I can show you the system in 10 minutes — employees, payroll, payslips and leave — using sample data, so nothing of yours is needed.

Would [day] at [time] or [day] at [time] work better? Or here's the self-guided demo: [Link]

#9 • After the demo [WhatsApp]

Thanks for your time today, [Name]. To recap: you pay [number] staff, payroll currently takes [hours], and the biggest headache is [pain]. The app handles that with [feature].

Next step: start your free 7-day trial here — no card needed: [Link]. I'll help you add your first employees so you see your own numbers. What time suits you tomorrow?

#10 • Trial check-in (day 2) [WhatsApp]

Hi [Name], how is the trial going? Have you added your employees yet? If you send me your staff list in Excel, I can show you how to import it in two minutes.

#11 • Referral request (happy customer) [WhatsApp]

Hi [Name], thank you for using our payroll system. If you know another business owner who struggles with payroll or staff records, I'd really appreciate an introduction. I'll take good care of them — and I'll [offer a thank-you you're comfortable with, e.g. a free month] for every business that subscribes.

#12 • WhatsApp Status / broadcast (opt-in list) [WhatsApp]

Month-end payroll stress? Run payroll, print payslips and track leave and loans from one app that works even without internet. Try it free for 7 days — no card. Reply "DEMO" or tap: [Link]

SMS — short and to the point (keep under 160 characters where possible)

#13 • Trial reminder (day 5) [SMS]

Hi [Name], your OKV Payroll trial ends in 2 days. Pick a plan from ₦15,000/month to keep your data and payslips. Need help? Call [Phone].

#14 • Month-end nudge [SMS]

Month-end payroll? Run it in OKV Payroll: PAYE, pension, NHF and payslips in one place. 7-day free trial, no card: [Link]

#15 • Payday tip [SMS]

Payday tip: update overtime, bonus and loan deductions BEFORE you confirm payroll. Need help? OKV Technology, [Phone].

#16 • Renewal / upgrade nudge [SMS]

Hi [Name], your OKV Payroll plan renews soon. Pay yearly and save up to ₦30,000 on Essential. Questions? [Phone].

3. Email templates

Write to one person, one idea per email, and end with one clear action. Subject lines are suggestions — test two of them.

Cold outreach and follow-up sequence

#17 • Cold email — first touch [Email]

Subject: Payroll at [Company] — a quicker way?

Hello [Name],

I'm [Your Name] from OKV Technology Consults. We build payroll and HR software for Nigerian businesses, churches, schools and NGOs.

Most of the teams we speak with tell us month-end is stressful: spreadsheets, corrections, printing payslips, and worrying about PAYE, pension and NHF. Our system calculates those deductions, produces payslips in one click, tracks leave and loans, and keeps working even when the network goes down.

You can try it free for 7 days with no card, and paid plans carry a 30-day money-back guarantee.

Would a 10-minute demo next week be useful? Or see it yourself here: [Link]

Kind regards,
[Your Name] • OKV Technology Consults • [Phone]

#18 • Follow-up 1 (day 3) [Email]

Subject: Re: Payroll at [Company]

Hello [Name],

A short follow-up. Here are three things teams like yours like about the system: (1) payslips for your whole company in one click, (2) leave and loan registers that feed payroll, and (3) it keeps working offline and syncs later.

If it helps, I can set up a sample payroll with your department names so you see it in your own context. Shall I?

[Your Name]

#19 • Follow-up 2 (day 8) — polite close-out [Email]

Subject: Should I close your file?

Hello [Name],

I haven't heard back, so I'll assume payroll is under control — great! If that changes (new staff, a painful month-end, a new auditor), the 7-day free trial is here: [Link]. I'll check in again next quarter.

[Your Name]

#20 • Post-demo recap [Email]

Subject: Recap and next steps for [Company]

Hello [Name], thanks for your time today.

What you told me: you pay [number] staff; the biggest pain is [pain].
What we saw: [feature 1], [feature 2], [feature 3].
Suggested plan: [Essential/Enterprise] — ₦[price] per [period].

Next step: start the free trial (no card) at [Link]. I'll help you import your staff list on a 15-minute call. Does [day/time] work?

Trial and customer lifecycle

#21 • Trial welcome (day 0) [Email]

Subject: Your 7-day trial — do these 3 things today

Welcome, [Name]! To see real value fast:

1. **Settings** → add your company name and payroll month.
2. **Employees** → add your staff (or Import CSV).
3. **Payroll Calculation** → see payroll and open a **Payslip**.

Stuck? Reply to this email or WhatsApp [Phone] and we'll help.

#22 • Trial day 5 nudge [Email]

Subject: Two days left — keep your data

Hi [Name], your trial ends in two days. If you've added your staff and run a payroll, upgrading keeps everything exactly as it is.

Plans from ₦15,000/month; yearly saves up to ₦30,000 on Essential. Upgrade in the app: Upgrade & Subscription → bank transfer → upload your receipt. You'll hear back within the hour.

Have a question about which plan fits? Reply and I'll help.

#23 • Trial ended — upgrade offer [Email]

Subject: Your trial has ended — your data is safe

Hi [Name], your free trial has ended. Your employees and payroll data are preserved. To continue, choose a plan from ₦15,000/month. Every paid plan has a 30-day money-back guarantee.

If something stopped you from upgrading, tell me — I'd like to fix it.

#24 • Win-back (30 days after trial) [Email]

Subject: Still doing payroll in Excel?

Hi [Name], it's been a month since your trial. I'm curious what held you back — price, time, missing feature? Reply with one word and I'll see what I can do. If you'd like a free 30-minute onboarding session to move your staff list in, I'll do it.

#25 • Monthly newsletter — “Payroll checklist” [Email]

Subject: This month’s payroll checklist (2 minutes)

Hi [Name], before you pay staff this month: ☐ leavers set to inactive ☐ new joiners added ☐ overtime, bonus and loan entries updated ☐ payroll month correct ☐ totals compared with last month ☐ payroll archived ☐ backup downloaded.

Want this as a printable page? Reply “checklist”. *Tip of the month:* [short tip].

#26 • Partnership email to accountants and HR consultants [Email]

Subject: A payroll tool your clients can afford

Hello [Name], I’m [Your Name] from OKV Technology Consults. Many of your clients need payroll but can’t justify expensive software. Our system is built for Nigerian SMEs: PAYE, pension and NHF calculations, payslips, leave and loans, offline-capable and priced from ₦15,000 a month.

We’d like to offer you a partner arrangement: [commission / discount / co-branded onboarding — your terms]. Could we talk for 15 minutes this week?

4. Social media posts

Post 3–5 times a week. Mix **education** (tips), **pain** (problems you solve), **proof** (demo screenshots, real customer results once you have them) and **offers** (trial, yearly plan). Use screenshots from the live demo for visuals — the dashboard, payslip and Upgrade screens are photogenic. Add your demo link in the first comment on Facebook/Instagram.

Education and tips

#27 • Month-end checklist [Facebook / LinkedIn]

Month-end payroll checklist for Nigerian SMEs:

☐ New joiners added
☐ Leavers made inactive
☐ Overtime, bonus and loan deductions updated
☐ Payroll month and year correct
☐ Totals compared with last month
☐ Payroll archived
☐ Payslips sent
☐ Backup saved

Save this post for payday. Want a payroll system that has all of these built in? Try ours free for 7 days: [Link]

#28 • What goes into net pay? [Instagram carousel / LinkedIn]

Slide 1: How is your take-home pay calculated?
Slide 2: Gross = basic + housing + transport + other allowances.
Slide 3: Less pension (employee share), NHF and PAYE tax.
Slide 4: Less any loan repayments. Add overtime and bonus.
Slide 5: = Net pay. OKV Payroll calculates every step and shows it on the payslip. Try it free: [Link]

#29 • Five payslip mistakes [Facebook / LinkedIn]

Five payslip mistakes that cost businesses trust: 1) wrong pension base, 2) forgetting a leaver, 3) stale overtime entries, 4) loan balances not updated, 5) no record of what was actually paid.

A good system archives every pay run so you always have the proof. See how: [Link]

#30 • Why archive payroll every month? [LinkedIn]

When an auditor, a staff member or the tax office asks “what did you pay in March?”, can you answer in 30 seconds?

Confirming and archiving each month locks in the official figures, so history doesn’t change if salaries or rates change later. It’s one click in OKV Payroll. [Link]

#31 • Backup habit [Facebook / X]

Quick question: when was your last payroll backup? Download one after every pay run, and always before a big import. In OKV Payroll it’s two clicks: Backup & Export → Download Full Backup. Try it free for 7 days: [Link]

#32 • Offline-first explained [Instagram / Facebook]

No light? No network? Payroll still has to be done.

OKV Payroll saves every change on your device instantly, then syncs to your secure online account when the internet returns. Install it on your phone, laptop or tablet — no app store needed. [Link]

#33 • Leave tracking [Facebook]

Still tracking leave in a notebook or WhatsApp group? Keep annual, sick, maternity and other leave in one register, approve or reject requests, and let staff request leave from their own portal. Start free: [Link]

Pain points and solutions

#34 • Excel vs a payroll system [LinkedIn]

Excel is brilliant — until it isn't. One wrong formula, one overwritten cell, one absent staff member, and payroll stops.

A payroll system gives you the same familiar records with calculations, payslips, leave, loans, backups and roles built in — and you can import your Excel data. Try it free for 7 days: [Link]

#35 • Stop printing payslips one by one [Facebook / Instagram]

One click: payslips for the whole company. One click: for one department. One click: a 12-month pack for one employee. Email them directly to staff. That's OKV Payroll. [Link]

#36 • For churches and ministries [Facebook]

Church administrators: pastors, workers and staff deserve accurate payslips and organised records. OKV Payroll helps you keep staff records, run payroll, track loans and leave, and print payslips — without the month-end spreadsheet stress. Free 7-day trial: [Link]

#37 • For schools [Facebook / Instagram]

School owners and bursars: teacher salaries, allowances, loans and leave — all in one system, with payslips you can print or email. Install it on your phone and run payroll anywhere. See the demo: [Link]

#38 • For NGOs [LinkedIn]

Donors and auditors ask for clear staff-cost records. Confirming and archiving each month's payroll gives you a permanent, consistent record, plus department reports you can print. See how OKV Payroll supports NGO operations: [Link]

#39 • For accountants and consultants [LinkedIn]

Running payroll for several clients? Our Enterprise plan supports unlimited employees and users with seven role types, so your team and your clients get the access they need — and nothing more. Let's talk about a partner arrangement: [Link]

#40 • Self-service portal [Instagram / Facebook]

Staff keep asking HR for their payslip? With My Portal they can see their own payslip, loan balance and leave status, and request leave from their phone. Less back-and-forth for HR. [Link]

Proof, offers and engagement

#41 • Demo walkthrough post [Facebook / LinkedIn]

We built a live demo so you can explore OKV Payroll before you sign up — every tab, every role, with sample data. Nothing you click is saved. Switch “View as” to see what an HR Officer or a staff member sees. Try it: [Link]

#42 • Pricing transparency [Instagram / Facebook]

Simple pricing, in Naira: Essential ₦15,000/month (up to 20 employees). Enterprise ₦35,000/month (unlimited employees). Pay every 6 months or yearly and save. 7-day free trial, no card. 30-day money-back guarantee. [Link]

#43 • Yearly plan offer [Facebook / WhatsApp Status]

Pay yearly and get two months free on Essential: ₦150,000 a year instead of ₦180,000. Enterprise yearly: ₦360,000 instead of ₦420,000. Start with the free trial, then choose your billing cycle. [Link]

#44 • Customer story template (use only with permission) [LinkedIn]

[Customer] used to [old way]. **The problem:** [pain]. **With OKV Payroll:** [what changed]. **Result:** [real result, in their words].

“[Quote]” — [Name, role, organisation]. Want similar results? [Link]

#45 • Poll / engagement post [Facebook / LinkedIn / X]

How do you run payroll today? ① Excel ② Another software ③ Manual / paper ④ An outsourced accountant. Comment your number — I’ll share tips for each.

#46 • Founder story / local pride [LinkedIn]

We’re a Nigerian company building software for how Nigerian businesses really work — with power cuts, patchy networks, PAYE, pension and NHF. OKV Payroll was designed offline-first from day one. If you’d like to shape what we build next, tell us what you need: [Link]

5. Short-video scripts

Vertical video, 20–45 seconds, captions on, phone camera is enough. Screen-record the demo for the visuals and add your voice-over. Hook in the first 2 seconds.

#47 • "Payroll in an afternoon" [Reel / TikTok / Status]

Hook (0–2s): "Still spending your whole weekend on payroll?"

Show (2–20s): screen-record: Employees → Payroll Calculation → Payslip. Voice: "Add your staff, enter overtime, and watch pension, NHF and PAYE calculate automatically."

CTA (20–30s): "Try it free for 7 days — link in bio."

#48 • "No light, no problem" [Reel / TikTok]

Hook: Show a dark room and a laptop on battery. Text: "No light. No network. Payroll due today."

Show: toggle airplane mode; add an employee; show the "Offline" indicator; turn internet back on; show "Synced".

CTA: "Offline-first payroll for Nigerian businesses. Try it free."

#49 • "One-click payslips" [Reel / Status]

Hook: "Watch me print 50 payslips in 10 seconds." (use demo data)

Show: Payslip → Whole Company → Download All Staff Payslips.

CTA: "See it yourself: demo link in bio."

#50 • "What does my staff see?" [Reel / LinkedIn video]

Hook: "You can control exactly what each person sees."

Show: use "View as" in the demo to flip between Admin, Payroll Officer and Staff Self-Service, showing the sidebar changing.

CTA: "Seven roles. You decide."

#51 • "Month-end checklist in 30 seconds" [Reel / TikTok]

Hook: "Save this before payday."

Show: text overlays of the 8-point month-end checklist, one every 3 seconds.

CTA: "Follow for more payroll tips."

#52 • "Excel to payroll system in 2 minutes" [Reel / YouTube Short]

Hook: "Have a staff list in Excel? Watch this."

Show: Employees → Export CSV template → paste data → Import CSV → employees appear.

CTA: "Free trial — link in bio."

6. Sales strategies and campaigns

Twenty plays you can start this month. Pick **three** that suit your time and budget, run them for 30 days, and measure. Each play lists the goal, the steps and the very first action to take today.

#53 • The 7-day free trial is the product

Goal	Turn the trial into the main way prospects experience the system.
Steps	• Make the trial link the single call to action on every message and post. • Offer to import their staff list for them on a 15-minute call. • Follow the trial-conversion cadence in chapter 8 (day 0, 2, 5, 7, 14). • Track trials started → trials that add 5+ employees → paid.
Do this first	Send your trial link to 10 warm contacts today and offer the import call.
Sample line	*Try it with your own staff list — I'll help you load it in 15 minutes.*

#54 • Payroll Health Check (free lead magnet)

Goal	Get prospects to share their real process so you can show a concrete improvement.
Steps	• Create a one-page checklist of 15 payroll questions (pension base, NHF, PAYE bands, loans, leaver handling, backups, payslip delivery). • Offer a free 20-minute "Payroll Health Check" call. • Score them and send a one-page summary with three improvements. • End with a demo of how the system covers the gaps.
Do this first	Turn the month-end checklist (#25) into a downloadable page and post it with the offer.
Sample line	*Want a free 20-minute payroll health check? I'll tell you three things to improve — no strings.*

#55 • Month-end timing campaign

Goal	Reach people when payroll pain is highest.
Steps	• Post and message between the 20th and the 2nd of each month. • Use messages #7, #12, #14 and posts #27 and #29. • Offer same-day demos during this window.
Do this first	Schedule your next month-end posts now so they go out automatically.

#56 • Church and ministry administrators network

Goal	Win a few respected churches; admins talk to each other.
Steps	• List 30 churches and ministries you can reach through your network. • Message the administrator or treasurer (not the general overseer) with #2. • Offer a free setup session for the first three churches and ask for a testimonial. • Ask each satisfied admin to introduce you to two others.
Do this first	Send #2 to five administrators you already know.

#57 • Private schools: the bursar route

Goal	Reach the person who actually runs staff payroll.
Steps	• Identify 40 private schools within reach. • Visit or message the bursar/admin officer with #3. • Time outreach to the start and end of term when budgets and salaries are discussed. • Offer a term-long pilot on Essential.
Do this first	Make a list of ten schools and the bursar's name for each.

#58 • Accountant and HR consultant referral partners

Goal	Let professionals who already advise SMEs recommend you.
Steps	• Identify 20 accountants, bookkeepers and HR consultants. • Send #4 or #26 and offer a partner demo. • Agree a simple arrangement (referral commission, client discount or co-branded onboarding) in writing. • Give partners a one-page leaflet and a referral link.
Do this first	Contact three accountants you already know and ask for a 15-minute call.

#59 • Convert your Excel-template customers

Goal	Your existing buyers already trust you and already have the problem.
Steps	• Segment your Selar buyers of management templates (Church, Organization, etc.). • Email and WhatsApp them: "Your template, upgraded — multi-user, synced, payslips." • Offer a yearly-plan discount to the first 20 to convert. • Ask them what they wish the template did — and feed the answers into your roadmap.
Do this first	Export your buyer list and send them a short, personal email.
Sample line	*You trusted our templates — here is the cloud version, with sync, roles and payslips. Try it free for 7 days.*

#60 • LinkedIn outreach for SMEs and NGOs

Goal	Reach finance and operations leads directly.
Steps	• Optimise your profile: one line on who you help. • Send 15 personalised connection requests a day to finance managers, HR leads and owners. • After they accept, send a short value message — not a pitch — then #8 if they engage. • Post two times a week using posts #27–#46.
Do this first	Rewrite your LinkedIn headline: "Payroll & HR software for Nigerian businesses — works offline."

#61 • WhatsApp community and groups

Goal	Show up where business owners already talk.
Steps	• Join 10 relevant business, church-admin, school-owner and HR groups. • Be helpful first: answer payroll questions and share the month-end checklist. • Only share your link where group rules allow, and when someone asks. • Move serious leads to a private chat.
Do this first	Answer three payroll questions in groups this week without selling.

#62 • Live webinar: “Payroll without stress”

Goal	Educate 30–50 people at once and capture leads.
Steps	• Pick a topic: month-end payroll, PAYE basics, or from Excel to a payroll system. • Promote for a week with posts #27–#33 and a sign-up form. • Teach for 25 minutes, demo for 10, Q&A for 10, then offer the trial. • Send the recording and a follow-up within 24 hours.
Do this first	Choose a date 10 days away and create the registration page.

#63 • Free “first payroll setup” offer

Goal	Remove the biggest barrier to starting: the effort of data entry.
Steps	• Offer to import the first 20 employees for free. • Request their staff list by WhatsApp or email. • Import via CSV, run a sample payroll and send them the screen recording. • Follow up when the trial reaches day 5.
Do this first	Add “free first setup” to your pinned WhatsApp Status and every demo follow-up.

#64 • Yearly plan pre-sell

Goal	Improve cash flow and retention by selling annual billing.
Steps	• After 14 days of a healthy trial, present the yearly saving (₦30,000 on Essential, ₦60,000 on Enterprise). • Show the per-month equivalent. • Remind them of the 30-day money-back guarantee. • Offer a small extra (priority onboarding call) for yearly sign-ups.
Do this first	Add the yearly saving line to your standard trial-day-5 message.

#65 • Referral programme for customers

Goal	Turn happy customers into your sales team.
Steps	• Decide a simple reward (for example one free month for each referral that subscribes). • Ask after a positive moment — the first successful payroll or first payslip email. • Give a referral link or code. • Thank them publicly (with permission) and pay the reward promptly.
Do this first	Send #11 to your three happiest customers.

#66 • Local business visits (“knock and demo”)

Goal	Win busy owners who answer calls but not messages.
Steps	• Choose a commercial area and visit 10 businesses in a morning. • Bring a tablet with the demo already open and a one-page leaflet. • Ask one question: “How do you do payroll now?” • Book a 15-minute follow-up before you leave.
Do this first	Print 50 leaflets with your QR code to the demo and pricing.

#67 • Content and SEO that answers real questions

Goal	Attract people searching for payroll help.
Steps	• Write short articles: “How to calculate PAYE in Nigeria”, “Payroll checklist for small businesses”, “Excel vs payroll software”, “Payslip template for Nigerian companies”. • Each article ends with the trial link. • Publish on your website and LinkedIn; repost snippets on social. • Keep PAYE content current and clearly dated.
Do this first	Publish the month-end checklist as your first article.

#68 • Google Business Profile and local reviews

Goal	Be found when someone searches “payroll software Nigeria” or “HR software Lagos”.
Steps	• Create or complete your Google Business Profile with photos and services. • Ask every happy customer for an honest review. • Reply to every review. • Add your WhatsApp number as the main contact.
Do this first	Claim your profile and add three screenshots of the dashboard.

#69 • Partner with banks’ SME desks, business clubs and associations

Goal	Borrow credibility and get room access.
Steps	• List associations: school owners, church administrators, hotel owners, manufacturers, chambers of commerce. • Offer a free 20-minute talk on payroll compliance and record-keeping. • Hand out the checklist and trial link. • Follow up with every attendee within 48 hours.
Do this first	Email three associations this week offering a short talk.

#70 • Enterprise consultative deals

Goal	Close larger organisations that need unlimited staff and onboarding.
Steps	• Run a 30-minute discovery (script #73). • Offer a proof-of-concept with their real department and 10 employees. • Involve the decision-maker (finance lead, HR head) early. • Send a written proposal (see the Proposal Samples pack) within 48 hours.
Do this first	Prepare a one-page Enterprise overview and a demo with their department names.

#71 • Win-back and re-engagement

Goal	Recover trials that didn’t convert and customers who lapsed.
Steps	• Segment: ended trial (0–30 days), ended trial (30+ days), lapsed customers. • Send #23, #24 or a personal voice note. • Offer a free onboarding session or a limited yearly discount. • Ask for feedback — it is product research.
Do this first	List every trial that ended without upgrading and message the five most recent today.

#72 • Case studies and proof library

Goal	Replace claims with evidence.
Steps	• After 60 days with a happy customer, ask for a 15-minute interview. • Get written permission for their name, logo and quotes. • Publish a one-page story: before, after, result. • Reuse it in email, LinkedIn and the proposal pack.
Do this first	Pick your most active customer and ask for an interview this week.

7. Call and demo scripts

#73 • Discovery call (20 minutes)

Step	What you say / ask	Listen for
1. Open (1 min)	“Thanks for your time. I’d like to ask a few questions about how you run payroll, then show you whether we can help. If not, I’ll tell you honestly. Is that okay?”	Permission and time available.
2. Situation (4 min)	“How many staff do you pay? How do you calculate and pay them now? Who does it?”	Headcount, tools, who is involved.
3. Pain (5 min)	“What is the hardest part of month-end? Any mistakes or late payments recently? How do you handle leave and loans? Where are staff records kept?”	Specific pains and stories.
4. Impact (3 min)	“Roughly how many hours does that take each month? What happens when the person who does it is away?”	Hours, risks, cost.
5. Vision (2 min)	“If this were easy, what would change for you?”	The buyer’s own words.
6. Fit and next step (5 min)	“Based on what you’ve said, [Essential/Enterprise] fits. Can I show you a 10-minute demo focusing on [their top pain]? Who else should join?”	Decision-maker and timing.

#74 • 10-minute demo flow

Minute	Screen	Talking point
0–1	Dashboard	“This is your month at a glance: gross, PAYE, pension, NHF and net pay, with department breakdowns.”
1–3	Employees and Import CSV	“Add staff here — or import your Excel list in minutes. Every staff member has salary components and bank details.”
3–5	Payroll Input → Payroll Calculation	“Enter overtime, bonus and loans; everything recalculates live. Confirm and archive locks the month.”
5–6	Payslip	“One payslip, a department, or the whole company — print, download or email.”
6–7	Leave and Loan registers; My Portal	“Staff can see their own payslip and request leave from their phone.”
7–8	“View as” roles	“You decide what each person sees — seven roles.”
8–9	Backup and offline	“Download a backup any time. And it keeps working offline.”
9–10	Upgrade & Subscription	“Start free for 7 days. When you’re ready, pay by bank transfer and upload your receipt.”

#75 • Closing script

Close — assume the trial

“Based on what you told me, here’s what I suggest: start the free trial today, add your [number] staff — I’ll help you import them — and run this month’s payroll side by side with your current method.”

“If you like it, choose [Essential/Enterprise]. Yearly saves you ₦[amount]. If it isn’t right within 30 days of your first payment, you get your money back. Shall we set up your account now?”

If they hesitate: “What is the one thing that would make this an easy yes?” **Then stop talking** and listen.

#76 • Handling “I’ll get back to you”

Follow-up plan

“Of course. So I can help, what would you need to see to decide — price, a demo for your team, or a trial with your own data?”

Agree a specific date: “Can I check in on [day]?” Put it in your calendar. Send #9 the same day. Follow the cadence in chapter 8.

8. Execution: cadence, 30-day plan and KPIs

8.1 Trial-conversion cadence

Day	Action	Use
0	Send welcome with the three first steps; offer the free import call.	#21, WhatsApp
1	Check the trial has started; answer questions.	WhatsApp
2	Ask if they have added employees; offer help importing.	#10
3	Share the month-end tip or checklist.	#7, #25
5	Remind: two days left; explain plans and yearly saving.	#22, #13
6	Phone call: “What do you need to decide?” Solve blockers.	Call
7	Trial ends: upgrade instructions; money-back guarantee.	#23
10	Friendly check-in with a voice note.	WhatsApp
14	Offer a limited yearly discount or a free onboarding session.	#24
30	Win-back message and feedback request.	#24, #71

8.2 30-day launch plan

Week	Focus	Targets
1	Set up: demo link, pricing link, WhatsApp Business profile, one-page leaflet, tracking sheet. Update website claims (see Foundation 1.5).	50 warm contacts listed; 10 messages sent (#1–#5)
2	Outreach: WhatsApp and LinkedIn; first posts (#27–#33); join groups (#61). Book demos.	40 messages; 10 demos booked; 5 trials
3	Partnerships and proof: contact accountants (#58) and associations (#69); Payroll Health Check (#54); first case-study conversation.	3 partner calls; 10 health checks; 10 trials cumulative
4	Close and convert: follow the cadence; yearly offer (#64); ask for referrals (#65); review what worked.	3–5 paid customers; 2 referrals; decide next month’s three plays

8.3 Weekly routine (about 5 hours)

- **Monday:** plan the week’s 3 posts and 20 outreach messages.
- **Tuesday–Thursday:** 20 new messages a day, 2 demos, answer trials.
- **Friday:** follow up every open conversation; ask one customer for a referral or testimonial.
- **Weekend:** record one video; update the tracking sheet; reflect on what worked.

8.4 KPIs to track

Metric	How to measure	Healthy signal
Messages sent → replies	Tracking sheet	Warm lists reply more than cold lists; the rate improves as you personalise
Replies → demos	Demos booked ÷ replies	Steady flow of demos from genuine conversations
Demos → trials	Trials started ÷ demos	Most demos end with a trial started
Trials → activated	Trials with 5+ employees added	Most trials get activated with your help
Activated → paid	Paid ÷ activated trials	Track and improve month by month
Average billing cycle	Share paying yearly or bi-annually	Rising share of yearly plans
Referrals	New customers from referrals	At least one a month after month two

Set your own targets after your first month of tracking — your own numbers are the only benchmark that counts.

Your next three actions

1) Send #1, #2, #3 or #4 to ten people today. 2) Put the demo link and trial link in your WhatsApp profile. 3) Choose three strategies from chapter 6 and write them on your wall.
